Not for product specifications

The technical data contained herein are intended as reference only. Please contact your local quality department for assistance and recommendations on specifications for this product.

THAWING:

1. Allow container to reach room temperature before use.
2. DO NOT open the container before contents reach 25°C temperature. Any moisture that collects on the thawed container should be removed prior to opening the container.
3. DO NOT re-freeze. Once thawed, the adhesive should not be re-frozen.

DIRECTIONS FOR USE

1. A positive displacement pump is recommended for reproducible shot sizes.
2. A needle size ≥18 gauge should be used.
3. For best results, dispense onto substrate warmed to 80°C.
4. Care should be taken to protect syringe material from excessive heat prior to dispense.
5. The cured properties of moisture contaminated material will be poorer than those described.
6. Once dispensed, material should be cured within 30 minutes to prevent moisture contamination.

STORAGE:

Store product in the unopened container in a dry location. Storage information may be indicated on the product container labeling.

Optimal Storage: -40°C. Storage below -40°C or greater than -40°C can adversely affect product properties.

Material removed from containers may be contaminated during use. Do not return product to the original container. Henkel Corporation cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.
