#### DESCRIPTION

A-1100 is a proprietary non-halogenated additive designed to reduce resin bleed out on a variety of surfaces with minimal or no affect on the adhesion properties of the formulation. It shows excellent results when used in non-metal filled systems after reducing bleed. It is co-curable in free-radical polymerization. It also can enhance the rheological properties of various filled adhesives.

## **RECOMMENDED FORMULATION USE:**

The A-1100 is recommended for use as an additive to reduce resin bleed out specifically on metal surfaces. The recommended addition of the A-1100 to a formulation is between 0.5% - 1% weight percent of resin. It shows superior bleed control in formulations that contain non-metal fillers such as silica.
